

**Amendments to the Specification**

Please replace paragraph [0017] with the following amended paragraph:

[0017] In another embodiment, a composition according to the principles of the invention comprises chlorothalonil, diquat bromide, urea and water. Chlorothalonil and diquat bromide can be admixed in a ratio of about 70:30 (wt. %) to form a mixture. Urea and water can be combined in a ratio of about 20:80 (wt. %) to form a solution. Then a quantity of the first mixture can be dissolved in the solution at a ratio of about ~~0.05 ounces~~ 1.42 grams (0.05 ounces) to ~~one gallon~~ 3.79 liters (one gallon) of the carrier to form a composition according to one embodiment of the invention. In another embodiment, 40-90 wt. % (60-80 wt. %) of chlorothalonil is admixed with 60-10 wt. % (40-20 wt. %) diquat bromide to form a mixture. Then a solution is formed comprising 10-40 wt. % (10-30 wt. %) urea and 90-60 wt. % (90-70 wt. %) water to form a carrier solution. By combining about ~~0.02-1.0 ounces~~ 0.57-28.35 grams (0.02-1.0 ounces) of the mixture with about ~~0.5-1.5 gallon~~ 1.89-5.68 liters (0.5-1.5 gallon), and preferably ~~one gallon~~ 3.79 liters (one gallon) of the carrier solution, a composition according to an embodiment of the invention is formed.

Please replace paragraph [0018] with the following amended paragraph:

[0018] In another embodiment, the composition of the invention includes chlorothalonil, trichloromelamine, urea and water. To form a composition according to this embodiment, chlorothalonil is admixed with trichloromelamine in a ratio of about 95:5 wt. % to form a mixture. About ~~0.05 ounces~~ 1.42 grams (0.05 ounces) of this mixture is then dissolved in a 20:80 wt. % solution of urea in water to form a composition according to this embodiment of the invention. The ratios provided herein can be varied to more particularly formulate a solution for treating witches' broom. For example, about ~~0.2-2.0 ounces~~ 5.67-56.70 grams

(0.2-2.0 ounces), of a mixture of about 80-98 wt. % (90-98 wt. %) of chlorothalonil and 20-2 wt. % (10-2 wt. %) trichloromelamine can be dissolved in a solution of urea and water (10-40 wt. % urea and the balance water) to form a composition according an embodiment of the invention.

Please replace the ABSTRACT with the following amended ABSTRACT:

The invention is directed to fungicide compositions adapted for preventing or inhibiting the ~~witches'~~ witches' broom disorder. In one embodiment, the composition contains chlorothalonil, trichloromelamine, urea and water. The composition can be sprayed to the afflicted portions of the plant (i.e., the brooms) to eradicate or inhibit the growth of the disease.
